

Papaya Leaf

Material

one nearly-ripe papaya

Equipment

carving knife

sharp-pointed knife

Instructions

1. Without peeling it cut the papaya, lengthwise into slices and remove the seeds.
2. Cut each slice into parallelogram-shaped pieces.
3. Remove the skin, giving a curved shape.
4. Trim the sides to the shape of a leaf.
5. With the tip of the knife, cut two curving grooves, tapering at each end, in the face of each leaf.
